

Vulcanus Pro Serija

Vulcanus Pro serija vrlo je popularna zbog velike toplinske stabilnosti, ravnomjerne raspodjele topline preko ploče za kuhanje, manje potrošnje drva i roštiljanja bez dima. Povećana učinkovitost neophodna je za hladniju klimu, vjetrovita mjesta i roštiljanje tijekom cijele sezone, što ga čini pametnom opcijom za profesionalne kuhare i HORECA segment.

Vulcanus Lite serija

Vulcanus Lite serija dolazi bez šamotnog ložišta s vrućim otpuštanjem što ovu seriju čini lakšom, jednostavnijom i cjenovno pristupačnijom.

Radi doživotne upotrebe koristi metalni podložak za ložište koje se vremenom uništava i može lako mijenjati umjesto cijelog ložišta.
